SOMAG

OSM 5000

The OSM 5000 is SOMAG's most powerful gimbal system for precise sensor stabilization in on-the-move environments. The gimbal is designed to ensure the best possible mobile data capturing wether on the road or off-road with heavy single- or multisensor payloads of up to 300 kg (660 lbs). IP class 67 protects the offroad gimbal from environmental influences such as dust, salt- and splash water.

TECHNICAL SPECIFICATIONS

Angular Stabilization Ranges	Pitch at 0° Roll:	≤± 12.2° | 14.1° (optional)
	Roll at 0° Pitch:	≤± 17.4° | 14.1° (optional)
	Yaw (Drift):	no drift correction
Residual Deviation[1]		≤0.3° rms
Payload[2]		300 kg | 250 kg | 200 kg 661 lbs | 551 lbs | 441 lbs
Continuous Torque		275 Nm
Dynamic Peak Torque[3]		550 Nm
Mass		54 kg | 119 lbs
Dimensions		290 mm | 11.42 in Ø665 mm | Ø26.18 in
IP Class		IP 67
Operating Temperature		-32 °C … +67 °C | -26 °F … +131 °F
Storage Temperature		-55 °C … +85 °C | -67 °F … +185 °F
Communication Interfaces		Ethernet | RS422 | RS232 (optional)
Operational Voltage		48 VDC (44...52 VDC)
Average Power Consumption[4] **at Operational Voltage**		100 W
Peak Power Consumption[4] **at Operational Voltage**		950 W
		IACS E10, DNV GL, 2006/42/EC Machinery

Preliminary data, subject to change.
The technical specifications in the metric system represent the binding reference values. The imperial units are rounded approximations and are provided for reference only.

[1] Vehicle motion ≤± 12° / 12°/s / 10°/s² - small periodical lateral accelerations (≤ 0.5 g) acceptable, constant lateral accelerations for more than 1 minute resulting from vehicle's turning maneuvers are compensated by internal or external GPS input. No GPS input could reduce the performance of the Mount during turning maneuvers.

[2] Possible payload weight depends on lateral acceleration and CoG of payload / shown data is based on 0.5 g lateral acceleration and a CoG payload offset to the Mount surface of: 370 mm (14.6 in) | 450 mm (17.7 in) | 550 mm (21.7 in)

[3] Maximum duration 90 s at 55 °C surrounding temperature | longer if temperature inside the unit is < 55 °C

[4] Horizontal payload CoG offsets are not considered; without wind force and other possible external forces
